| Number of approved years: | 1 |

Technology Planning Committee

Rena Heard, Karen Hartmann, Raymond Sanders, Ron Foster, Gary Morris, Deanna Blacconeri, Gloria Valle, Rosa Zapata, Helen Lloyd, David Costello

Executive Summary

This Technology ePlan for Edgewood Independent School District updates and enhances our previous one-year plan, which was peer-reviewed and approved for one year by Region 20 and TEA. The ePlan incorporates many technology funding programs and new requirements into one consolidated plan which reflects more fully educational, instructional, staff developmental, and documents our initiatives in fulfilling the expectations and requirements of Texas Long-Range Plan, Title II, Part D of the No Child Left Behind Act and E-Rate. Our Needs Assessment came from many areas and are listed in the plan, but specifically we incorporated elements from the Texas StaR Chart, LoTi, the Texas Education Agency (TEA) Technology Plan Approval Form for Participants in Universal Service Fund E-Rate Discounts, EasyTech technology proficiency assessments for fifth grade students, and the requirements from the Edgewood District Technology Committee.

We have incorporated Edgewood ISD's goals, budget, time lines, monitoring personnel and anticipated resources. This plan is a living document and will be periodically updated to match new requirements, funding resources and changes in technology.

This plan is driven by the integration of technology into the teaching and learning processes. We are using the robust technology architecture developed over the past few years under the E-Rate program and are now utilizing the convergence of voice, video, and data. We continue to show the impact of the NCLB act on instruction and staff development, as well as provide accountability for each aspect referenced.

This ePlan establishes clear goals, observable and measurable products and evaluation materials and corresponding time lines for using technology to equip our students with the information age skills necessary to achieve, both academically and in the marketplace.

Needs Assessment

Assessment Process:

EISD ISD uses the StaR Chart, LoTi Process, TEKS, the District Improvement Plan, EasyTech's proficiency assessments of students, past Technology Plans, and Instructional Technology Teachers' Forums to develop our formal technology Needs Assessment. We also include input from the Principal's Meetings, District Education Improvement Council (DEIC) Meetings, and Superintendent's Cabinet Meetings. Lastly, we meet at the Texas Regional Extension Service Center (Region 20) with regional Technology Coordinators and Directors to discuss goals and strategies of the State of Texas, the Regions, and other like districts who share educational and instructional programs and projects for the future. As we define our needs we coordinate our curriculum and instructional needs with our telecommunications and internal structure needs to support our district. We have used our Needs Assessment to create a very strong foundation so that the physical aspects of technology are readily available for our students, teachers, support staff and administrators.

Edgewood ISD is careful in developing a Needs Analysis and Statement of Need to make efficient use of our support of our infrastructure. Additionally, we will continue to utilize the Teacher STaR chart data to effectively guide us in creating future technology plans.

Existing Conditions:

Following our Needs Assessment process over the past years, we have fulfilled our goals on an incremental basis. We have merged our voice, data, and video systems utilizing a switched network that delivers video to the desktop at 100 Mps and moves data at gigabyte speeds. We have fully implemented voice over Internet Protocol throughout the district. Also, we provide online distance learning to the desktop as another media for teachers to utilize for electronic teaching and learning. We continue to use both fixed-room computer labs for both students and staff development centers, as well as wireless-connected mobile labs in a number of our schools.

All classrooms have seven network drops. Libraries and special training areas have more, depending on their requirements. Each classroom is equipped with a phone that is enabled with voice messaging. Each campus has video conferencing capability and access to electronic field trips.

This structure delivers online services such as Power Media Plus, an online video/audio library, and Digital Knowledge Central, with extensive reference resources to enhance teaching and learning. In addition, this structure enables the utilization of educator tools such as EduSoft and Wireless Generation for managing and monitoring student progress of District Benchmarks and TAKS objectives.

All PK-3 teachers (including Campus Reading Interventionists and Campus Reading Specialists) use handheld devices for administering student assessments and monitoring their academic progress to identify areas of weakness for remediation.

All teachers are expected to complete technology performance assessments that confirm their ability to utilize the technology available. An extensive staff development program is in place to assist teachers, and other employees, to develop these skills that are delineated in technology section of Texas' State Board of Educator Certification.

We will continue the migration of our online curriculum into Riverdeep's Curriculum Management System which will enable better coordination of lesson planning, student performance, staff development and the monitoring of the teaching and learning of TAKS objectives.

Also, we expect to continue the implementation of Learning.com's EasyTech assessment of student technology skills in fifth and eighth grades.

Technology Needs:

All users, but particularly teachers and students, need to continue to increase their technology skills so as to best utilize the technology services available. There is a significant need to increase the integration of technology into everyday teaching and learning. This integration process must include regular classroom instruction, technology-assisted assessments, and extensions of the classroom such as G.T.s Camp Edges summer program, electronic field trips, the development of webs, robotics and the development of digital yearbooks.

Various learning modalities of employees and students must be accommodated by the increased use of visual and auditory media, such as broadcasting locally created videos, as well as utilizing those available through subscription services. Students must be better aware of and participate in career pathways that can prepare them for high-skill industry demands. As a result of these activities, students will not only improve their technology skills, they will also better develop content knowledge.

We must continue to do a better job of improving communications among district employees by utilizing technologies that organize, access and present data. And through conferences and online services we need to continue to better communicate with students, parents and other community members how to effectively utilize such services as the district's web site and online students' grades and attendance.

Therefore, we must continue our well-established and effective technology staff development program so that all employees can develop skills and so that instruction will evolve to meet these need.

We must continue to collect and better utilize data that show how well our students are developing skills necessary for future education and employment. We must implement a uniform and systematic replacement of outdated equipment, programs and software. We must continue to make the necessary purchases to meet the goal of a 1:1 ratio of students to computing devices. Our needs assessments also shows that we continue to have a significant need to improve technical support, especially to schools.

With all areas of the district increasingly utilizing web-base services, there is a need to increase the bandwidth for Internet access.

Goals, Objectives, and Strategies

GOAL 1: Increase the number of technology proficient teachers, librarians and administrators to strengthen teaching and learning

OBJECTIVE 1.1:

During this school year, 55% of teachers will meet SBEC standards as measured by the District's Technology Assessments, Phase 1 & 2

Budget Amount \$31,973.00

LRPT category: Educator Preparation and Development

E-Rate Correlates: ER02

NCLB Correlates: 01, 03, 04a, 04b, 06, 07, 11

| Strategies | | State/Status: | Timeline: | Person(s) Responsible: | Evidence: |
|------------|---|---|-------------|--|--|
| 1.1.1: | <p>Maintain staff development sessions and online study guides; assist all teachers in successfully completing the District's Technology Assessments, Phases 1 & 2</p> <p>Comments: Assessments measure knowledge & skills. Phase 1 = MS Windows, MS Outlook, MS Word; Phase 2 = MS PowerPoint, Internet, Inspiration. Equipment incentives are offered to those who complete these assessments. Tech Ed Funds: \$10,960; Title II, Part D: \$13,913</p> <p>LEA LRPT Correlates: EP01, EP04, EP05, EP08, LAS03, LAS06, LAS10, LAS12</p> | <p>State: Revised</p> <p>Status: In Progress</p> | 2008 - 2009 | Instructional Technology Director, Instructional Technology Specialist, Campus Technology Teachers | Attendance data, web pages, web page hit counters, feedback via written and online forms regarding sessions and study guides |
| 1.1.2: | <p>Continue to use teacher survey instruments, the LoTi and STaR Chart, to assess technology skills-level and technology implementation; utilize survey data for professional development planning.</p> <p>Comments: LoTi = Level of Technology Integration. Tech Ed: \$3,500</p> <p>LEA LRPT Correlates: EP05, LAS01, LAS02, LAS03</p> | <p>State: Revised</p> <p>Status: In Progress</p> | 2008-2009 | Instructional Technology Director, Instructional Technology Specialist, Campus Administrator, Campus Technology Teachers | Online LoTi and STaR Chart data, reports |
| 1.1.3: | <p>Continue to conduct staff development sessions for all K-3 teachers on using PDAs in the administration and management of classroom instruction</p> <p>Comments: TPRI & Tejas Lee</p> <p>LEA LRPT Correlates: EP03, EP06, LAS05, LAS06, LAS08, TL04, TL05, TL06, TL07, TL08</p> | <p>State: Original</p> <p>Status: In Progress</p> | 2008 - 2009 | Content Specialists, Campus Technology Teachers | Attendance rosters, observational data, PDA generated reports |

| Total | \$41,496,647.00 | |

Evaluation

Evaluation Process:

Instruction:

In keeping with the plan's design, one or more persons have the responsibility of seeing that progress is being made in meeting each portion of the plan. These persons will make adjustments as needed, communicate progress to members of the Technology Planning Committee, and to their superiors to determine when and if portions of the plan have been achieved. These same persons will make recommendations as to the need for inclusions of their assigned areas in the following year's plan, or the need to focus on objectives that build on current achievements.

Campus technology literacy teachers will also monitor the progress of meeting each of the components of the plan that center on school activities and school personnel. The Instructional Technology Director and Specialist have frequent meetings with technology literacy teachers, affording them the opportunity to provide anecdotal and formal reports on achievements, impediments to progress and feedback from school constituents.

Furthermore, throughout the year members of the Technology Planning Committee present reports to and seek feedback from those attending meetings of Principals and the District Educational Improvement Council. Each campus and district department is represented on the Council.

A copy of the plan is available on both the district's intranet and World Wide Web.

Using this information, the Technology Planning Committee will determine when and how adjustments are made to meet all components of the plan

Infrastructure:

The Technology Infrastructure is monitored on a weekly basis during a Program Management Review by the Program Management Review Committee. All work performed is called out by a Project Number, an E-Rate FRN number, and a Purchase Order number all tied to the Campus on which the work is performed. During the week, Edgewood supports a Senior Systems Engineer and a Senior Systems Technician/Quality Assurance Inspector who visually inspect all aspects of the installation work performed. The Edgewood team is also accompanied by a contractor Quality Control Inspector who works in tandem with the Edgewood Quality Assurance Inspector. The work is performed using Edgewood guidelines for Networking and Systems as well as Industry Standards and Code. At the end of the project, an Acceptance Plan, which was developed for each campus, is used to test and evaluate the installation and work performed to ensure that it meets or exceeds our stated requirements in the Statement of Needs in the RFP, Proposal, and Contract. All of these evaluations become part of the deliverable and are entered into the final Program Management Documentation.

Evaluation Method:

Instruction:

Interactive software and video resources, such as Accelerated Reader, Accelerated Math, CEI, Star Math, Meridian Algebra, Perfect Copy, Fast ForWord, and Plato include ongoing assessment components. Assessment results guide adjustments to each student's instructional program.

Data from each campus' STaR chart is collected, compiled in a graphical format and distributed to all District Executive Directors, to the Technology Planning Committee, to the District Educational Improvement Council and to principals and Technology Literacy Teachers on all campuses. Each classroom teacher completes the LoTi at the end of the school year. Results will guide the evaluation of the professional development program, and the distribution and maintenance of technology devices. Formal evaluations of teachers include a component that assesses classroom uses of technology.

The Instructional Technology Department has designed and administers performance assessments of teachers' technology knowledge and skills. These assessments are based on SBEC standards and range in levels of difficulty. As part of their campus improvement plan, each campus is expected to increase the number of teachers successfully completing these assessments.

Assessment results are maintained in a database, and each teacher's progress is periodically sent to his or her principal. The Instructional Technology Department periodically compiles the assessment data from each campus. These data are periodically reported to the Assistant Superintendent of Curriculum and Instruction, to the Elementary and Secondary Executive Directors, to the Executive Director of Federal & State Programs.

District technology benchmarks serve as a standard to guide the implementation of technology. The benchmarks assure that students meet challenging state academic standards and the Technology Application TEKS, at the appropriate grade level.

Learning.com's EasyTech assessment of technology knowledge and skills is administered to fifth and eighth grade students. Results from this assessment will guide adjustments to the district's technology program.

Finally, the use of rubrics, surveys and assessments call for the creation of student products. Hard data from these various instruments will evaluate the progress of both students and teachers in meeting various components of the plan.

Infrastructure:

We use an Acceptance Test Plan along with our Quality Assurance Inspector for each technology project. The Plan is a specified deliverable of each contract and is made part of the Program Management Documentation. The Program Management Documentation is reviewed weekly at the Program Management Review Meeting where we use Program Evaluation Review Techniques (PERT) to review the timelines, critical path, slack-time, resources, and quality control.

Our Senior Systems Engineer/Network Administrator has developed a systems monitoring program which allows him to review Quality of Service (QoS) on our telecommunications and Internet Services that are leased or paid for on an annual tariff. If the services fall below our QoS standards, then the provider is notified to correct the connectivity, data rate, speed, or problem within four hours. Acquisition of these services is through a bid process and funded through a combination of district funds, state grant funding, and the Federal E-Rate program. All providers have been approved for this program by the FCC and are awarded a SPIN number to identify them as approved and qualified providers. These services are plotted on our Program timelines and are incorporated into our Infrastructure serving our campuses.
